JOURNAL OF AIRCRAFT
Vol. 48, No. 6, November–December 2011

2011 *Journal of Aircraft* Index

How to Use the Index

In the Subject Index, pages 2185–2191, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, pages 2192–2194, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 2195–2202, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2011, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

AIRCRAFT TECHNOLOGY, CONVENTIONAL, SHORT TAKEOFF AND LANDING/ VERTICAL TAKEOFF AND LANDING

Aerodynamics

C11-157 Numerical Simulation of Gurney Flap on RAE-2822 Supercritical Airfoil
C11-174 Deformation and Breakup of Water Droplets near an Airfoil Leading Edge
C11-175 Numerical Simulation of Free-Flight Rockets Air-Launched From a Helicopter
C11-163 Optimization of Three-Dimensional Wings in Ground Effect Using Multiobjective Genetic Algorithm
C11-183 Stall Warning Using Flap Hinge Moment Measurements
C11-182 Aeroelastic Analysis of a Hingeless Rotor Using a Dynamic Wake Model
C11-165 Computational Drag Prediction of the DPW4 Configuration Using the Far-Field Approach
C11-181 Extended Nonlinear Lifting-Line Method for Aerodynamic Modeling of Reconfigurable Aircraft
C11-002 Intake Ground Vortex Prediction Methods
C11-152 Detached-Eddy Simulation of a Coflow Jet Airfoil at High Angle of Attack
C11-162 Eulerian Modeling of Large Droplet Physics Toward Realistic Aircraft Icing Simulation
C11-150 Efficient Aerodynamic Design of Complex Configurations by Patch-Surface Approach
C11-111 Frequency Dependence of ZONA6
C11-197 Vortical Flow Prediction Validation for an Unmanned Combat Air Vehicle Model
C11-199 Smart Aerodynamic Surface for a Typical Military Aircraft Using Shape Memory Elements
C11-105 Influence of Blade Aerodynamic Model on Prediction of Helicopter Rotor Aeroacoustic Signatures
C11-091 Improvement to Patched Grid Technique with High-Order Conservative Remapping Method
C11-100 1303 Unmanned Combat Air Vehicle Flowfield Simulations and Comparison with Experimental Data
C11-109 Performance of Coflow Jet Airfoils with Conformal Slot Geometries
C11-106 Active Transonic Aerofoil Design Optimization Using Robust Multiobjective Evolutionary Algorithms
C11-088 Aerodynamic Performance of Extended Formation Flight
C11-095 Feedback-Controlled Forcefully Attached Flow on a Stalled Airfoil
C11-087 Numerical Optimization and Experimental Investigations on the Principle of the Vortex Diffuser
C11-092 Aerodynamic Effects of Structural Flexibility in Two-Dimensional Insect Flapping Flight
C11-099 Aerodynamic Evaluation of Miniature Trailing-Edge Effectors for Active Rotor Control
C11-094 Aerodynamic Considerations in the Design of Truss-Braced-Wing Aircraft
C11-104 Flow Control of Tiltrotor Unmanned-Aerial-Vehicle Airfoils Using Synthetic Jets
C11-071 Multigrid Acceleration and Chimera Technique for Viscous Flow Past a Hovering Rotor
C11-035 Robust Design Optimization of Unmanned Aerial Vehicle Coaxial Rotor Considering Operational Uncertainty
C11-083 Modeling of Wing Rock Based on Frequency Spectrum Analysis to Free-to-Roll Time History
C11-006 Aerostructural Model for Morphing Laminar Wing Optimization in a Wind Tunnel
C11-050 Ducted-Fan Force and Moment Control via Steady and Synthetic Jets
C11-075 Aerodynamic Characteristics of High-Lift Devices with Downward Deflection of Spoiler
C11-061 Three-Dimensional Effects on Sliding and Waving Wings
C11-034 Effect of Streamwise Attachment Gap on Aerodynamic Characteristics of Gurney Flaps
C11-062 Estimation of Turbulent Vertical Velocity from Nonlinear Simulations of Aircraft Response
C11-054 Uncertainty Identification of Supersonic Wind-Tunnel Testing
C11-031 Optimal Movable Wing Tip Strake
C11-056 Computational Evaluation of the Performance of Lifting Surfaces with Leading-Edge Protuberances
C11-030 Design of Adjoint-Based Laws for Wing Flutter Control
C11-010 FENSAP-ICE-Unsteady: Unified In-Flight Icing Simulation Methodology for Aircraft, Rotorcraft, and Jet Engines
C11-004 Framework for Establishing Limits of Tabular Aerodynamic Models for Flight Dynamics Analysis
C11-067 High-Lift Multi-Element Airfoil Shape and Setting Optimization Using Multi-Objective Evolutionary Algorithms
C11-069 Range and Endurance Estimates for Battery-Powered Aircraft
C11-081 Full-Scale Flight Tests of Active Flow Control to Reduce Tiltrotor Aircraft Download
C11-024 Optimization via FENSAP-ICE of Aircraft Hot-Air Anti-Icing Systems
C11-047 Influence of Blade Aerodynamic Model on the Prediction of Helicopter High-Frequency Airloads
C11-073 Experimental Studies of Open Cavity Configurations at Transonic Speeds with Flow Control
C11-014 Longitudinal Aerodynamics of a Vertical Takeoff and Landing Micro Air Vehicle
C11-025 Study of the Reverse Delta Wing
C11-022 Usage of Numerical Optimization in Wind Turbine Airfoil Design
C11-200 Experimental Setup for the Study of Runback Ice at Full Scale
C11-208 Integrated Experimental-Numerical Analysis of High-Agility Aircraft Wake Vortex Evolution
C11-222 Estimating Propeller Slipstream Drag on Airplane Performance
C11-142 Simulating the Flows About Cargo Containers Used During Parachute Airdrop Operations

C11-176 Experimental Investigation of the Effect of Trip Strips at Low Reynolds Number
C11-204 Aerodynamics of Airfoils at High and Reverse Angles of Attack
C11-110 Effect of Slenderness Ratio on Free-to-Roll Wing Aerodynamics
C11-121 Low-Reynolds-Number Effect on Aerodynamic Characteristics of a NACA 0012 Airfoil

Aeroelasticity and Aeroservoelasticity

C11-182 Aeroelastic Analysis of a Hingeless Rotor Using a Dynamic Wake Model
C11-170 Influence of Using Various Unsteady Aerodynamic Models on Propeller Flutter Prediction
C11-154 Aeroelastic Analysis and Experiment for Wing/Store Model with Stiction Nonlinearity
C11-159 Incremental Method for Structural Analysis of Joined-Wing Aircraft
C11-179 Robust Design Optimization of Flexible Backswept Wings with Structural Uncertainties
C11-111 Frequency Dependence of ZONA6
C11-127 Flutter Analysis of Aerostructures Test Wing with Test Validated Structural Dynamic Model
C11-119 Optimal Structural Topology of a Platelike Wing for Subsonic Aeroelastic Stability
C11-008 Coupled Multibody/Computational Fluid Dynamics Simulation of Maneuvering Flexible Aircraft
C11-033 Solution of the Flutter Eigenvalue Problem with Mixed Structural/Aerodynamic Uncertainty
C11-085 Aeroelastic Analysis of T-Tails Using an Enhanced Doublet Lattice Method
C11-030 Design of Adjoint-Based Laws for Wing Flutter Control
C11-053 Optimization of Helicopter Rotor Using Polynomial and Neural Network Metamodels
C11-032 Flutter of an Aircraft Flying on Mars
C11-224 Unsteady Aerodynamic Model Tuning for Precise Flutter Prediction
C11-188 Shooting-Based Complete Bifurcation Prediction for Aeroelastic Systems with Freeplay
C11-072 Limit Cycle Oscillations of Plate-Type Fins Using Increased-Order Models
C11-117 Industrial Application of Robust Aeroelastic Analysis
C11-120 Gust-Response Analysis of Free Elastic Aircraft in the Transonic Flight Regime
C11-118 Wake Effects of Free-Wake Model on Aeroelastic Behavior of Hovering Rotors

Air Transportation

C11-151 Harmonizing European and American Aviation Modernization Efforts Through Visual Analytics
C11-205 Air Traffic Control Service Quality Perceptions of Domestic Airline Pilots in Turkey
C11-174 Deformation and Breakup of Water Droplets near an Airfoil Leading Edge
C11-078 Taxonomy to Guide Systems-of-Systems Decision-Making in Air Transportation Problems
C11-088 Aerodynamic Performance of Extended Formation Flight
C11-219 Sizing of a Fully Integrated Hypersonic Commercial Airliner
C11-067 High-Lift Multi-Element Airfoil Shape and Setting Optimization Using Multi-Objective Evolutionary Algorithms
C11-011 Novel Air Traffic Procedures: Investigation of Off-Nominal Scenarios and Potential Hazards
C11-141 New European Union Approach to Civil Aviation Accident Investigation and Prevention
C11-194 Effects of the Mismatch Between Design Capabilities and Actual Aircraft Utilization
C11-029 Evaluation of Tactical Conflict Resolution Algorithms for En Route Airspace
C11-164 Multiple-Point Integrated Scheduling of Terminal Area Traffic
C11-130 Improved Range Equation Based on Aircraft Flight Data
C11-123 Multi-Aircraft Dynamic Continuous Descent Approach Methodology for Low-Noise and Emission Guidance

Airframe-Propulsion Integration

C11-178 Multi-Objective Optimization of a Turbofan for an Advanced, Single-Aisle Transport

Airframe-Weapon System Integration

C11-175 Numerical Simulation of Free-Flight Rockets Air-Launched from a Helicopter

Cabin Environment, Crew Training, and Life Support

C11-177 Assessment of Narrow-Body Transport Airplane Evacuation by Numerical Simulation
C11-065 Predicting Ejection Velocity of Ejection Seat via Back Propagation Neural Network
C11-206 Dynamic Simulation of Aircraft Environmental Control System Based on Flowmaster

Collision Avoidance

C11-029 Evaluation of Tactical Conflict Resolution Algorithms for En Route Airspace
C11-211 Foam-Core Effect on the Integrity of Tailplane Leading Edge During Bird-Strike Event

Communication and Air Traffic Control

C11-129 Departure and Approach Procedures for Unmanned Aircraft Systems in a Visual-Flight-Rule Environment
C11-164 Multiple-Point Integrated Scheduling of Terminal Area Traffic
C11-029 Evaluation of Tactical Conflict Resolution Algorithms for En Route Airspace
C11-108 Estimating Aircraft Fuel Flow for a Three-Degree Flight-Path-Angle Descent

Configuration Design

C11-178 Multi-Objective Optimization of a Turbofan for an Advanced, Single-Aisle Transport
C11-158 Mission Performance Considered as Point Performance in Aircraft Design
C11-184 Undercarriage Lateral Tip-Over Criteria: A Parametric Study
C11-150 Efficient Aerodynamic Design of Complex Configurations by Patch-Surface Approach
C11-201 Optimum Aspect Ratio for Subsonic Air Vehicles
C11-035 Robust Design Optimization of Unmanned Aerial Vehicle Coaxial Rotor Considering Operational Uncertainty
C11-094 Aerodynamic Considerations in the Design of Truss-Braced-Wing Aircraft
C11-197 Vortical Flow Prediction Validation for an Unmanned Combat Air Vehicle Model
C11-077 Value-Driven Design
C11-031 Optimal Movable Wing Tip Strake
C11-059 Morphing Aircraft Sizing Using Design Optimization
C11-068 Propulsion System of Jet-Flapped Subsonic Civil Transport Aircraft Design
C11-049 Flight Dynamics and Stability of a Tethered Inflatable Kiteplane
C11-125 Advanced Sonic Boom Prediction Using the Augmented Burgers Equation
C11-134 Setup and Test Flights of All-Electric Two-Seater Aeroplane Powered by Fuel Cells
C11-113 Mixed-Fidelity Approach for Design of Low-Boom Supersonic Aircraft
C11-191 Investigating the Potential of Using Quota Count as a Design Metric

Deceleration Systems

C11-142 Simulating the Flows About Cargo Containers Used During Parachute Airdrop Operations
C11-003 Computational Investigation of the Flow Around a Parachute Model

Economics

C11-194 Effects of the Mismatch Between Design Capabilities and Actual Aircraft Utilization
C11-077 Value-Driven Design

Flight Mechanics

C11-180 Nonlinear Longitudinal Aerodynamic Modeling Using Neural Gauss–Newton Method
C11-171 Example of the Integration of Atmospheric Flight Equations
C11-155 Seven Guidelines for Limiting Pilot Task Demand Load During Area Navigation Approaches
C11-096 Safety Considerations for Helicopter Roll on Takeoffs
C11-098 Factors that Influence Pilot Task Demand Load During Area Navigation Approaches
C11-087 Numerical Optimization and Experimental Investigations on the Principle of the Vortex Diffuser
C11-097 Flight Mechanical Evaluation of Approaches
C11-038 Modeling of Flight Dynamics of Morphing Wing Aircraft
C11-083 Modeling of Wing Rock Based on Frequency Spectrum Analysis to Free-to-Roll Time History
C11-062 Estimation of Turbulent Vertical Velocity from Nonlinear Simulations of Aircraft Response
C11-064 Testing and System Identification of an Ornithopter in Longitudinal Flight
C11-222 Estimating Propeller Slipstream Drag on Airplane Performance
C11-041 Modeling of Dynamic Loading of Morphing-Wing Aircraft
C11-169 Climb Performance of a Piston-Propeller Airplane with Cambered Wing and Variable Propeller Efficiency

Flight Operations

C11-183 Stall Warning Using Flap Hinge Moment Measurements
C11-088 Aerodynamic Performance of Extended Formation Flight
C11-155 Seven Guidelines for Limiting Pilot Task Demand Load During Area Navigation Approaches

C11-001 Optimal, Environmentally Friendly Departure Procedures for Civil Aircraft
C11-130 Improved Range Equation Based on Aircraft Flight Data
C11-097 Flight Mechanical Evaluation of Approaches
C11-098 Factors that Influence Pilot Task Demand Load During Area Navigation Approaches

Flow Control

C11-220 Airfoil Separation Control Using Multiple-Orifice Air-Jet Vortex Generators
C11-129 Departure and Approach Procedures for Unmanned Aircraft Systems in a Visual-Flight-Rule Environment
C11-152 Detached-Eddy Simulation of a Coflow Jet Airfoil at High Angle of Attack
C11-157 Numerical Simulation of Gurney Flap on RAE-2822 Supercritical Airfoil
C11-095 Feedback-Controlled Forcefully Attached Flow on a Stalled Airfoil
C11-109 Performance of Coflow Jet Airfoils with Conformal Slot Geometries
C11-106 Active Transonic Aerofoil Design Optimization Using Robust Multiobjective Evolutionary Algorithms
C11-050 Ducted-Fan Force and Moment Control via Steady and Synthetic Jets
C11-099 Aerodynamic Evaluation of Miniature Trailing-Edge Effectors for Active Rotor Control
C11-104 Flow Control of Tiltrotor Unmanned-Aerial-Vehicle Airfoils Using Synthetic Jets
C11-073 Experimental Studies of Open Cavity Configurations at Transonic Speeds with Flow Control
C11-081 Full-Scale Flight Tests of Active Flow Control to Reduce Tiltrotor Aircraft Download
C11-018 Optimization of Active/Passive Flow Control Parameters on Airfoils at Transonic Speeds
C11-121 Low-Reynolds-Number Effect on Aerodynamic Characteristics of a NACA 0012 Airfoil
C11-176 Experimental Investigation of the Effect of Trip Strips at Low Reynolds Number
C11-025 Study of the Reverse Delta Wing

Fuels and Fuel Systems

C11-108 Estimating Aircraft Fuel Flow for a Three-Degree Flight-Path-Angle Descent

General Aviation

C11-135 Reliable and Cost-Effective Flight Testing of Ultralight Aircraft
C11-212 Development of a Probabilistic Linear Damage Methodology for Small Aircraft
C11-169 Climb Performance of a Piston-Propeller Airplane with Cambered Wing and Variable Propeller Efficiency
C11-200 Experimental Setup for the Study of Runback Ice at Full Scale
C11-015 Flight Tests, Performances, and Flight Certification of a Twin-Engine Light Aircraft

Lighter-than-Air Systems

C11-052 Dynamic Response to Turbulence of Tethered Lighter-than-Air Platforms
C11-102 Uncertainty Analysis of a Dynamic Model of a Novel Remotely Piloted Airship
C11-139 Research on Thermal Characteristics of Photovoltaic Array of Stratospheric Airship
C11-207 Stability of Lobed Superpressure Balloons During Ascent
C11-060 Tethered Aerostat Modeling Using an Efficient Recursive Rigid-Body Dynamics Approach
C11-021 Estimating the Deployment Pressure in Pumpkin Balloons

Micro Air Vehicles

C11-198 Modal Analysis of a Flexible Membrane Wing of Micro Air Vehicles
C11-061 Three-Dimensional Effects on Sliding and Waving Wings
C11-034 Effect of Streamwise Attachment Gap on Aerodynamic Characteristics of Gurney Flaps
C11-092 Aerodynamic Effects of Structural Flexibility in Two-Dimensional Insect Flapping Flight
C11-017 Recovery of Energy from Leading- and Trailing-Edge Vortices in Tandem-Airfoil Configurations
C11-039 Transient Poststall Aerodynamic Modeling for Extreme Maneuvers in Micro Air Vehicles
C11-069 Range and Endurance Estimates for Battery-Powered Aircraft
C11-176 Experimental Investigation of the Effect of Trip Strips at Low Reynolds Number
C11-223 Modal Analysis of a Composite Wing of Micro Air Vehicle
C11-014 Longitudinal Aerodynamics of a Vertical Takeoff and Landing Micro Air Vehicle

Noise

C11-125 Advanced Sonic Boom Prediction Using the Augmented Burgers Equation
C11-042 Flyover Noise Measurements of a Spiraling Noise Abatement Approach Procedure
C11-105 Influence of Blade Aerodynamic Model on Prediction of Helicopter Rotor Aeroacoustic Signatures

Performance

C11-201 Optimum Aspect Ratio for Subsonic Air Vehicles
C11-158 Mission Performance Considered as Point Performance in Aircraft Design
C11-019 Experimental and Computational Evaluation of Small Microcoaxial Rotor in Hover
C11-087 Numerical Optimization and Experimental Investigations on the Principle of the Vortex Diffuser
C11-169 Climb Performance of a Piston-Propeller Airplane with Cambered Wing and Variable Propeller Efficiency
C11-130 Improved Range Equation Based on Aircraft Flight Data
C11-194 Effects of the Mismatch Between Design Capabilities and Actual Aircraft Utilization
C11-015 Flight Tests, Performances, and Flight Certification of a Twin-Engine Light Aircraft

Powerplant Integration

C11-192 Performance Prediction of Inlet Barrier Filters for Rotorcraft Engines
C11-222 Estimating Propeller Slipstream Drag on Airplane Performance

Propeller and Rotor Systems

C11-170 Influence of Using Various Unsteady Aerodynamic Models on Propeller Flutter Prediction

Rotorcraft

C11-105 Influence of Blade Aerodynamic Model on Prediction of Helicopter Rotor Aeroacoustic Signatures
C11-153 Uncertainty Quantification in Helicopter Performance Using Monte Carlo Simulations
C11-175 Numerical Simulation of Free-Flight Rockets Air-Launched From a Helicopter
C11-035 Robust Design Optimization of Unmanned Aerial Vehicle Coaxial Rotor Considering Operational Uncertainty
C11-099 Aerodynamic Evaluation of Miniature Trailing-Edge Effectors for Active Rotor Control
C11-096 Safety Considerations for Helicopter Roll on Takeoffs
C11-081 Full-Scale Flight Tests of Active Flow Control to Reduce Tiltrotor Aircraft Download
C11-053 Optimization of Helicopter Rotor Using Polynomial and Neural Network Metamodels
C11-028 Investigation on the Fatigue Life of an Al 8090 Helicopter Riveted T-Joint
C11-204 Aerodynamics of Airfoils at High and Reverse Angles of Attack
C11-192 Performance Prediction of Inlet Barrier Filters for Rotorcraft Engines
C11-019 Experimental and Computational Evaluation of Small Microcoaxial Rotor in Hover

Safety

C11-141 New European Union Approach to Civil Aviation Accident Investigation and Prevention
C11-011 Novel Air Traffic Procedures: Investigation of Off-Nominal Scenarios and Potential Hazards
C11-065 Predicting Ejection Velocity of Ejection Seat via Back Propagation Neural Network
C11-132 Two Men in a Cockpit: Casualty Likelihood if One Pilot Becomes Incapacitated
C11-080 System-Level Airworthiness Tool
C11-043 Uncertainty Importance Measure by Fast Fourier Transform for Wing Transonic Flutter
C11-058 Importance Analysis of the Aircraft Flap Mechanism Movement Failure
C11-020 Evaluation of Shear-Thickening-Fluid Kevlar for Large-Fragment-Containment Applications
C11-190 Novel Approach to Risk Assessment of Aircraft Electrical Wiring Interconnect System
C11-209 Simulation of Large Fragment Impacts on Shear-Thickening Fluid Kevlar Fabric Barriers

Simulation

C11-163 Optimization of Three-Dimensional Wings in Ground Effect Using Multiobjective Genetic Algorithm
C11-206 Dynamic Simulation of Aircraft Environmental Control System Based on Flowmaster
C11-065 Predicting Ejection Velocity of Ejection Seat via Back Propagation Neural Network
C11-044 Research on Energy Transmission Capacity Improvement of the Aircraft Electric Power System
C11-083 Modeling of Wing Rock Based on Frequency Spectrum Analysis to Free-to-Roll Time History

C11-209 Simulation of Large Fragment Impacts on Shear-Thickening Fluid Kevlar Fabric Barriers
C11-060 Tethered Aerostat Modeling Using an Efficient Recursive Rigid-Body Dynamics Approach
C11-131 Steel Structure Impacting onto Water: Coupled Finite Element–Smoothed-Particle-Hydrodynamics Numerical Modeling
C11-161 Modeling of Urban Wind Field Effects on Unmanned Rotorcraft Flight
C11-123 Multi-Aircraft Dynamic Continuous Descent Approach Methodology for Low-Noise and Emission Guidance
C11-112 Research on a New Aircraft Point-Mass Model

Stealth

C11-195 Shotline Method for Estimating the Aircraft Infrared Radiant Intensity

Short Takeoff and Landing/Vertical Takeoff and Landing/Short Takeoff and Vertical Landing Aircraft

C11-050 Ducted-Fan Force and Moment Control via Steady and Synthetic Jets
C11-138 Boundary-Layer Suction System Design for Laminar-Flying-Wing Aircraft

Structural Design (Including Loads)

C11-119 Optimal Structural Topology of a Platelike Wing for Subsonic Aeroelastic Stability
C11-173 New Topology Optimization Method for Wing Leading-Edge Ribs
C11-217 Structure Optimization of Large Composite Wing Box with Parallel Genetic Algorithm
C11-143 Analytical Modeling of Runway Stone Lofting
C11-021 Estimating the Deployment Pressure in Pumpkin Balloons
C11-199 Smart Aerodynamic Surface for a Typical Military Aircraft Using Shape Memory Elements
C11-145 Refined Numerical Simulation of Three-Dimensional Riveting in Laminated Composites
C11-114 Experiments with Geometric Nonlinear Coupling for Analytical Validation
C11-072 Limit Cycle Oscillations of Plate-Type Fins Using Increased-Order Models

Structural Materials

C11-131 Steel Structure Impacting onto Water: Coupled Finite Element–Smoothed-Particle-Hydrodynamics Numerical Modeling
C11-199 Smart Aerodynamic Surface for a Typical Military Aircraft Using Shape Memory Elements

System Effectiveness

C11-191 Investigating the Potential of Using Quota Count as a Design Metric
C11-195 Shotline Method for Estimating the Aircraft Infrared Radiant Intensity

Testing, Flight, and Ground

C11-127 Flutter Analysis of Aerostructures Test Wing with Test Validated Structural Dynamic Model
C11-054 Uncertainty Identification of Supersonic Wind-Tunnel Testing
C11-101 Ultrasonic De-Icing of Wind-Tunnel Impact Icing
C11-135 Reliable and Cost-Effective Flight Testing of Ultralight Aircraft
C11-224 Unsteady Aerodynamic Model Tuning for Precise Flutter Prediction
C11-042 Flyover Noise Measurements of a Spiraling Noise Abatement Approach Procedure
C11-117 Industrial Application of Robust Aeroelastic Analysis
C11-134 Setup and Test Flights of All-Electric Two-Seater Aeroplane Powered by Fuel Cells
C11-114 Experiments with Geometric Nonlinear Coupling for Analytical Validation

Uninhabited and Unmanned Air Vehicles

C11-159 Incremental Method for Structural Analysis of Joined-Wing Aircraft
C11-038 Modeling of Flight Dynamics of Morphing Wing Aircraft
C11-129 Departure and Approach Procedures for Unmanned Aircraft Systems in a Visual-Flight-Rule Environment
C11-136 Unmanned Aircraft Systems in the Civil Airworthiness Regulatory System: A Case Study
C11-069 Range and Endurance Estimates for Battery-Powered Aircraft
C11-027 Optimal Unmanned Aerial Vehicle Flights for Seeability and Endurance in Winds
C11-034 Effect of Streamwise Attachment Gap on Aerodynamic Characteristics of Gurney Flaps
C11-019 Experimental and Computational Evaluation of Small Microcoaxial Rotor in Hover
C11-161 Modeling of Urban Wind Field Effects on Unmanned Rotorcraft Flight
C11-080 System-Level Airworthiness Tool

Vibration

C11-101 Ultrasonic De-Icing of Wind-Tunnel Impact Icing

Weather Hazards

C11-062 Estimation of Turbulent Vertical Velocity from Nonlinear Simulations of Aircraft Response
C11-074 Ice Shape Characterization Using Self-Organizing Maps
C11-174 Deformation and Breakup of Water Droplets near an Airfoil Leading Edge

COMPUTING, INFORMATION, AND COMMUNICATION

Aerospace Electronics

C11-044 Research on Energy Transmission Capacity Improvement of the Aircraft Electric Power System

Air Traffic Control Systems

C11-205 Air Traffic Control Service Quality Perceptions of Domestic Airline Pilots in Turkey
C11-066 Optimal Scheduling and Speed Adjustment in En Route Sector for Arriving Airplanes
C11-147 New Air Traffic Control Markets Promoted by Single Sky Regulation in Spain
C11-151 Harmonizing European and American Aviation Modernization Efforts Through Visual Analytics

ENERGY

Alternate Fuels

C11-122 Hybrid Solid Oxide Fuel Cell and Micro Gas Turbine for Regional Jets

Fuel Cells

C11-134 Setup and Test Flights of All-Electric Two-Seater Aeroplane Powered by Fuel Cells
C11-122 Hybrid Solid Oxide Fuel Cell and Micro Gas Turbine for Regional Jets

Photovoltaic Power

C11-139 Research on Thermal Characteristics of Photovoltaic Array of Stratospheric Airship

Wind Power

C11-017 Recovery of Energy from Leading- and Trailing-Edge Vortices in Tandem-Airfoil Configurations
C11-049 Flight Dynamics and Stability of a Tethered Inflatable Kiteplane

FLIGHT SIMULATOR SYSTEMS

Guidance, Navigation, and Control Systems

C11-171 Example of the Integration of Atmospheric Flight Equations
C11-112 Research on a New Aircraft Point-Mass Model

FLUID DYNAMICS

Aeroacoustics

C11-162 Eulerian Modeling of Large Droplet Physics Toward Realistic Aircraft Icing Simulation
C11-047 Influence of Blade Aerodynamic Model on the Prediction of Helicopter High-Frequency Airloads
C11-012 Cavity Flow Assessment Using Advanced Turbulence Methods
C11-040 Assessment of Low-Noise Nozzle Designs for Fighter Aircraft Applications

Boundary-Layer Stability and Transition

C11-115 Design of a Supersonic Natural Laminar Flow Wing–Body
C11-189 Automatic Transition Prediction for Three-Dimensional Configurations with Focus on Industrial Application
C11-138 Boundary-Layer Suction System Design for Laminar-Flying-Wing Aircraft

Computational Fluid Dynamics

C11-165 Computational Drag Prediction of the DPW4 Configuration Using the Far-Field Approach
C11-210 Summary of the First AIAA CFD High-Lift Prediction Workshop
C11-157 Numerical Simulation of Gurney Flap on RAE-2822 Supercritical Airfoil
C11-197 Vortical Flow Prediction Validation for an Unmanned Combat Air Vehicle Model
C11-214 Two-Level Wing–Body-Fairing Optimization of a Civil Transport Aircraft
C11-202 Numerical Study of Transient Aircraft Cabin Flowfield with Unsteady Air Supply
C11-086 Benefits of Incorporating Designer Preferences Within a Multi-Objective Airfoil Design Framework
C11-091 Improvement to Patched Grid Technique with High-Order Conservative Remapping Method
C11-100 1303 Unmanned Combat Air Vehicle Flowfield Simulations and Comparison with Experimental Data

C11-071 Multigrid Acceleration and Chimera Technique for Viscous Flow Past a Hovering Rotor
C11-104 Flow Control of Tiltrotor Unmanned-Aerial-Vehicle Airfoils Using Synthetic Jets
C11-103 Improvement of Unstructured Computational Fluid Dynamics Simulations Through Novel Mesh Generation Methodologies
C11-012 Cavity Flow Assessment Using Advanced Turbulence Methods
C11-016 Behavior of Detached-Eddy Simulations for Mild Airfoil Trailing-Edge Separation
C11-036 Computational Fluid Dynamics Analysis of Nozzle Plume Effects on Sonic Boom Signature
C11-018 Optimization of Active/Passive Flow Control Parameters on Airfoils at Transonic Speeds
C11-026 Robust Design Optimization of Airfoils with Respect to Ice Accretion
C11-056 Computational Evaluation of the Performance of Lifting Surfaces with Leading-Edge Protuberances
C11-030 Design of Adjoint-Based Laws for Wing Flutter Control
C11-010 FENSAP-ICE-Unsteady: Unified In-Flight Icing Simulation Methodology for Aircraft, Rotorcraft, and Jet Engines
C11-004 Framework for Establishing Limits of Tabular Aerodynamic Models for Flight Dynamics Analysis
C11-003 Computational Investigation of the Flow Around a Parachute Model
C11-070 Euler Calculation of Rotor-Airframe Interaction Based on Unstructured Overset Grids
C11-037 Fluid-Structure Coupled Analysis of a Transport Aircraft and Flight-Test Validation
C11-204 Aerodynamics of Airfoils at High and Reverse Angles of Attack
C11-189 Automatic Transition Prediction for Three-Dimensional Configurations with Focus on Industrial Application
C11-024 Optimization via FENSAP-ICE of Aircraft Hot-Air Anti-Icing Systems
C11-128 Estimation of Captive Flight Loads Using Grid-Free Euler Solver
C11-149 Investigating Negative Drag in Grid Convergence for Two-Dimensional Euler Solutions
C11-146 Spurious Far-Field-Boundary Induced Drag in Two-Dimensional Flow Simulations

Hydrodynamics

C11-193 Ice Accretion Model on Multi-Element Airfoil

Inlet, Nozzle, Diffuser, and Channel Flows

C11-036 Computational Fluid Dynamics Analysis of Nozzle Plume Effects on Sonic Boom Signature
C11-002 Intake Ground Vortex Prediction Methods

Separated Flows

C11-110 Effect of Slenderness Ratio on Free-to-Roll Wing Aerodynamics

Subsonic Flow

C11-181 Extended Nonlinear Lifting-Line Method for Aerodynamic Modeling of Reconfigurable Aircraft
C11-056 Computational Evaluation of the Performance of Lifting Surfaces with Leading-Edge Protuberances
C11-016 Behavior of Detached-Eddy Simulations for Mild Airfoil Trailing-Edge Separation

Supersonic Flow

C11-115 Design of a Supersonic Natural Laminar Flow Wing–Body
C11-054 Uncertainty Identification of Supersonic Wind-Tunnel Testing
C11-036 Computational Fluid Dynamics Analysis of Nozzle Plume Effects on Sonic Boom Signature

Transonic Flow

C11-018 Optimization of Active/Passive Flow Control Parameters on Airfoils at Transonic Speeds
C11-103 Improvement of Unstructured Computational Fluid Dynamics Simulations Through Novel Mesh Generation Methodologies

Unsteady Flows

C11-092 Aerodynamic Effects of Structural Flexibility in Two-Dimensional Insect Flapping Flight
C11-202 Numerical Study of Transient Aircraft Cabin Flowfield with Unsteady Air Supply
C11-017 Recovery of Energy from Leading- and Trailing-Edge Vortices in Tandem-Airfoil Configurations
C11-070 Euler Calculation of Rotor-Airframe Interaction Based on Unstructured Overset Grids
C11-039 Transient Poststall Aerodynamic Modeling for Extreme Maneuvers in Micro Air Vehicles

Vortices

C11-012 Cavity Flow Assessment Using Advanced Turbulence Methods
C11-084 Assessment of Wake-Vortex Encounter Probabilities for Crosswind Departure Scenarios
C11-002 Intake Ground Vortex Prediction Methods
C11-047 Influence of Blade Aerodynamic Model on the Prediction of Helicopter High-Frequency Airloads
C11-031 Optimal Movable Wing Tip Strake
C11-061 Three-Dimensional Effects on Sliding and Waving Wings
C11-110 Effect of Slenderness Ratio on Free-to-Roll Wing Aerodynamics
C11-208 Integrated Experimental-Numerical Analysis of High-Agility Aircraft Wake Vortex Evolution
C11-025 Study of the Reverse Delta Wing

GUIDANCE, CONTROL, AND DYNAMICS TECHNOLOGY

Aircraft Dynamics

C11-171 Example of the Integration of Atmospheric Flight Equations
C11-041 Modeling of Dynamic Loading of Morphing-Wing Aircraft
C11-064 Testing and System Identification of an Ornithopter in Longitudinal Flight
C11-038 Modeling of Flight Dynamics of Morphing Wing Aircraft

Aircraft Guidance

C11-144 Ionospheric Threat Mitigation by Geometry Screening in Ground-Based Augmentation Systems

Aircraft Stability and Control

C11-156 Analysis of Medium-Speed Runway Exit Maneuvers

Avionics Systems

C11-144 Ionospheric Threat Mitigation by Geometry Screening in Ground-Based Augmentation Systems
C11-005 Experimental Testing of a Parametric-Model-Based Takeoff Performance Monitoring Strategy

Dynamics

C11-156 Analysis of Medium-Speed Runway Exit Maneuvers

Flight Mechanics

C11-015 Flight Tests, Performances, and Flight Certification of a Twin-Engine Light Aircraft
C11-049 Flight Dynamics and Stability of a Tethered Inflatable Kiteplane

Handling Qualities

C11-156 Analysis of Medium-Speed Runway Exit Maneuvers

Navigation

C11-144 Ionospheric Threat Mitigation by Geometry Screening in Ground-Based Augmentation Systems

Optimization Techniques

C11-044 Research on Energy Transmission Capacity Improvement of the Aircraft Electric Power System
C11-106 Active Transonic Aerofoil Design Optimization Using Robust Multiobjective Evolutionary Algorithms
C11-179 Robust Design Optimization of Flexible Backswept Wings with Structural Uncertainties
C11-067 High-Lift Multi-Element Airfoil Shape and Setting Optimization Using Multi-Objective Evolutionary Algorithms
C11-027 Optimal Unmanned Aerial Vehicle Flights for Seeability and Endurance in Winds
C11-053 Optimization of Helicopter Rotor Using Polynomial and Neural Network Metamodels
C11-115 Design of a Supersonic Natural Laminar Flow Wing–Body
C11-113 Mixed-Fidelity Approach for Design of Low-Boom Supersonic Aircraft
C11-066 Optimal Scheduling and Speed Adjustment in En Route Sector for Arriving Airplanes

Trajectory Optimization

C11-221 Uncertainty Tolerance of Multiobjective Environmentally Friendly Departure Procedures for Civil Aircraft

Unmanned Aerial Vehicles

C11-136 Unmanned Aircraft Systems in the Civil Airworthiness Regulatory System: A Case Study

INTERDISCIPLINARY TOPICS

Aerospace Management

C11-147 New Air Traffic Control Markets Promoted by Single Sky Regulation in Spain

C11-084 Assessment of Wake-Vortex Encounter Probabilities for Crosswind Departure Scenarios
C11-046 Managing Failures of Aircraft Systems by Coapplication of Parametric and Nonparametric Methods

Unmanned Systems

C11-076 Systems Engineering Perspectives on Technology Readiness Assessments in Software-Intensive System Development

STRUCTURAL MECHANICS AND MATERIALS

Aeroelasticity and Control

C11-186 Structural Sizing, Aeroelastic Analysis, and Optimization in Aircraft Conceptual Design

C11-185 Effects of Sloshing on Flutter Prediction of Liquid-Filled Circular Cylindrical Shell
C11-037 Fluid-Structure Coupled Analysis of a Transport Aircraft and Flight-Test Validation
C11-090 Flutter of Aircraft Wings Carrying a Powered Engine Under Roll Maneuver
C11-159 Incremental Method for Structural Analysis of Joined-Wing Aircraft

Dynamic Model Analysis

C11-041 Modeling of Dynamic Loading of Morphing-Wing Aircraft
C11-126 Numerical Continuation Applied to Landing Gear Mechanism Analysis
C11-188 Shooting-Based Complete Bifurcation Prediction for Aeroelastic Systems with Freeplay

Flexible and Active Structures

C11-196 Theoretical and Experimental Analysis of Hysteresis in Piezocomposite Airfoils Using Preisach Model
C11-006 Aerostructural Model for Morphing Laminar Wing Optimization in a Wind Tunnel

Materials Structural Properties

C11-124 Residual Stress Effects and Fatigue Behavior of Friction-Stir-Welded 2198-T8 Al-Li Alloy Joints
C11-055 Elastic Deformation Analysis of Adhesively Bonded Composite Butt Joints in Tension
C11-168 Crack Analysis of the Fourth-Stage Compressor Blades

Structural Composite Materials

C11-137 Buckling Behavior of an Orthotropic Plate Strip Under Combined Compression and Shear
C11-215 Fatigue Behavior of Fiber/Metal Laminate Panels Containing Internal Carbon Tear Straps
C11-055 Elastic Deformation Analysis of Adhesively Bonded Composite Butt Joints in Tension
C11-009 Bilevel Optimization of Blended Composite Wing Panels
C11-082 Material Selection for a Curved C-Spar Based on Cost Optimization

Structural Design

C11-186 Structural Sizing, Aeroelastic Analysis, and Optimization in Aircraft Conceptual Design
C11-089 Quantification of Modeling Uncertainty in Aeroelastic Analyses
C11-215 Fatigue Behavior of Fiber/Metal Laminate Panels Containing Internal Carbon Tear Straps
C11-166 Wing-Box Weight Optimization Using Curvilinear Spars and Ribs (SpaRibs)
C11-048 Single-Stringer Compression Specimen for the Assessment of Damage Tolerance of Postbuckled Structures
C11-007 Comparative Study on Optimal Stiffener Placement for Curvilinearly Stiffened Panels
C11-082 Material Selection for a Curved C-Spar Based on Cost Optimization
C11-114 Experiments with Geometric Nonlinear Coupling for Analytical Validation
C11-124 Residual Stress Effects and Fatigue Behavior of Friction-Stir-Welded 2198-T8 Al-Li Alloy Joints
C11-143 Analytical Modeling of Runway Stone Lofting
C11-013 Inverse Shape Design of Deformable Structures and Deformable Wings
C11-116 Design, Optimization, and Evaluation of Integrally Stiffened Al-7050 Panel with Curved Stiffeners

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

C11-212 Development of a Probabilistic Linear Damage Methodology for Small Aircraft
C11-203 Random Propagation of a Crack in a Thin-Walled Beam
C11-215 Fatigue Behavior of Fiber/Metal Laminate Panels Containing Internal Carbon Tear Straps
C11-140 Fatigue Crack Initiation and Propagation in Aileron Lever Using Successive-Initiation Modeling Approach
C11-093 Stress Intensity Factor Solution for Cracks at an Offset Loaded Fastener Hole
C11-028 Investigation on the Fatigue Life of an Al 8090 Helicopter Riveted T-Joint
C11-057 Failure Analysis of Cracks in the Upper Shaft of Torque Arm
C11-133 Impact of Mechanical Strain Environment on Aircraft Protective Coatings and Corrosion Protection
C11-124 Residual Stress Effects and Fatigue Behavior of Friction-Stir-Welded 2198-T8 Al-Li Alloy Joints

Structural Dynamics and Characterization

C11-187 Random Response Analysis of Curvilinearly Stiffened Plates Using Element-Free Galerkin Method
C11-127 Flutter Analysis of Aerostructures Test Wing with Test Validated Structural Dynamic Model
C11-185 Effects of Sloshing on Flutter Prediction of Liquid-Filled Circular Cylindrical Shell
C11-196 Theoretical and Experimental Analysis of Hysteresis in Piezocomposite Airfoils Using Preisach Model
C11-218 Structural Dynamics Model of Multi-Segmented Folding Wings: Theory and Experiment
C11-107 Approach to Assess Bird Strike Resistance for a Wing Slat Structure

Structural Finite Elements

C11-051 Stress in Triple-Row Riveted Lap Joints Under the Influence of Specific Factors
C11-093 Stress Intensity Factor Solution for Cracks at an Offset Loaded Fastener Hole
C11-185 Effects of Sloshing on Flutter Prediction of Liquid-Filled Circular Cylindrical Shell
C11-055 Elastic Deformation Analysis of Adhesively Bonded Composite Butt Joints in Tension
C11-028 Investigation on the Fatigue Life of an Al 8090 Helicopter Riveted T-Joint
C11-140 Fatigue Crack Initiation and Propagation in Aileron Lever Using Successive-Initiation Modeling Approach
C11-116 Design, Optimization, and Evaluation of Integrally Stiffened Al-7050 Panel with Curved Stiffeners
C11-145 Refined Numerical Simulation of Three-Dimensional Riveting in Laminated Composites
C11-048 Single-Stringer Compression Specimen for the Assessment of Damage Tolerance of Postbuckled Structures

Structural Modeling

C11-051 Stress in Triple-Row Riveted Lap Joints Under the Influence of Specific Factors
C11-093 Stress Intensity Factor Solution for Cracks at an Offset Loaded Fastener Hole
C11-196 Theoretical and Experimental Analysis of Hysteresis in Piezocomposite Airfoils Using Preisach Model
C11-218 Structural Dynamics Model of Multi-Segmented Folding Wings: Theory and Experiment
C11-013 Inverse Shape Design of Deformable Structures and Deformable Wings
C11-145 Refined Numerical Simulation of Three-Dimensional Riveting in Laminated Composites

Structural Optimization

C11-007 Comparative Study on Optimal Stiffener Placement for Curvilinearly Stiffened Panels
C11-179 Robust Design Optimization of Flexible Backswept Wings with Structural Uncertainties
C11-186 Structural Sizing, Aeroelastic Analysis, and Optimization in Aircraft Conceptual Design
C11-116 Design, Optimization, and Evaluation of Integrally Stiffened Al-7050 Panel with Curved Stiffeners
C11-216 Reliability-Based Design of Representative Wing and Tail System Together with Structural Tests
C11-009 Bilevel Optimization of Blended Composite Wing Panels

Structural Stability

C11-090 Flutter of Aircraft Wings Carrying a Powered Engine Under Roll Maneuver
C11-021 Estimating the Deployment Pressure in Pumpkin Balloons
C11-048 Single-Stringer Compression Specimen for the Assessment of Damage Tolerance of Postbuckled Structures
C11-007 Comparative Study on Optimal Stiffener Placement for Curvilinearly Stiffened Panels

THERMOPHYSICS AND HEAT TRANSFER

Aerothermodynamics/Thermal Protection

C11-193 Ice Accretion Model on Multi-Element Airfoil

Computational Heat Transfer

C11-024 Optimization via FENSAP-ICE of Aircraft Hot-Air Anti-Icing Systems

Mixed Convection

C11-202 Numerical Study of Transient Aircraft Cabin Flowfield with Unsteady Air Supply

Thermal Modeling and Analysis

C11-139 Research on Thermal Characteristics of Photovoltaic Array of Stratospheric Airship

Chronological Index

C06-101 Refining Satellite Methods for Pitot-Static Calibration. Robert J. Niewoehner, *U.S. Naval Academy* (**43**, 3, p .846) Technical Note
Technical Comment by A. Flint, *NASA Johnson Space Center*, and R. J. Niewoehner, *U.S. Naval Academy* (**48**, 3, p. 1119)

C09-194 Three-Dimensional Aerodynamic Simulations of Jumping. Paratroopers and Falling Cargo Payloads. Victor Udoewa, *University of Cape Town*, South Africa (**46**, 5, p. 1727) Article
Technical Comment by T. E. Tezduyar, *Rice University*, (**48**, 4, p. 1471)
Reply by author to T. E. Tezduyar (**48**, 4, p. 1472)

C11-001 Optimal, Environmentally Friendly Departure Procedures for Civil Aircraft. R. Torres and J. Chaptal, *Airbus, S.A.S.*, France; C. Bés and J.-B. Hiriart-Urruty, *Université de Toulouse*, France (**48**, 1, p. 11) Article based on AIAA Paper 2009-6931

C11-002 Intake Ground Vortex Prediction Methods. J. P. Murphy and D. G. MacManus, *Cranfield University*, Great Britain (**48**, 1, p. 23) Article

C11-003 Computational Investigation of the Flow Around a Parachute Model. Mark McQuilling, Lauren Lobosky, and Steven Sander, *Saint Louis University* (**48**, 1, p. 34) Article based on AIAA Paper 2009-3978

C11-004 Framework for Establishing Limits of Tabular Aerodynamic Models for Flight Dynamics Analysis. M. Ghoreyshi, K. J. Badcock, A. Da Ronch, S. Marques, A. Swift, and N. Ames, *University of Liverpool*, Great Britain (**48**, 1, p. 42) Article

C11-005 Experimental Testing of a Parametric-Model-Based Takeoff Performance Monitoring Strategy. Shane D. Pinder, *Defiant Engineering, Inc.*, Canada; Trever G. Crowe and Peter N. Nikiforuk, *University of Saskatchewan*, Canada (**48**, 1, p. 56) Article

C11-006 Aerostructural Model for Morphing Laminar Wing Optimization in a Wind Tunnel. Daniel Coutu, Vladimir Brailovski, and Patrick Terriault, *École de Technologie Supérieure*, Canada; Mahmoud Mamou, *National Research Council*, Canada; and Youssef Mebarki, *École de Technologie Supérieure*, Canada (**48**, 1, p. 66) Article

C11-007 Comparative Study on Optimal Stiffener Placement for Curvilinearly Stiffened Panels. Manav Bhatia, Rakesh K. Kapania, and Dane Evans, *Virginia Polytechnic Institute and State University* (**48**, 1, p. 77) Article

C11-008 Coupled Multibody/Computational Fluid Dynamics Simulation of Maneuvering Flexible Aircraft. Luca Cavagna, Pierangelo Masarati, and Giuseppe Quaranta, *Politecnico di Milano*, Italy (**48**, 1, p. 92) Article

C11-009 Bilevel Optimization of Blended Composite Wing Panels. Dianzi Liu, Vassili V. Toroporov, Osvaldo M. Querin, and David C. Barton, *University of Leeds*, Great Britain (**48**, 1, p. 107) Article

C11-010 FENSAP-ICE-Unsteady: Unified In-Flight Icing Simulation Methodology for Aircraft, Rotorcraft, and Jet Engines. Cristhian N. Aliaga, Martin S. Aubé, and Guido S. Baruzzi, *Newmerical Technologies International*, Canada; and Wagdi G. Habashi, *McGill University*, Canada (**48**, 1, p. 119) Article

C11-011 Novel Air Traffic Procedures: Investigation of Off-Nominal Scenarios and Potential Hazards. Giorgio Calanni Fraccone and Vitali Volovoi, *Georgia Institute of Technology*; Alfredo E. Colón, *NASA Headquarters*; and Matthew Blake, *Sensis Corporation* (**48**, 1, p. 127) Article

C11-012 Cavity Flow Assessment Using Advanced Turbulence Methods. Nicholas D. Liggett and Marilyn J. Smith, *Georgia Institute of Technology* (**48**, 1, p. 141) Article

C11-013 Inverse Shape Design of Deformable Structures and Deformable Wings. Alejandro C. Limache, *International Center of Computational Methods in Engineering*, Argentina (**48**, 1, p. 157) Article

C11-014 Longitudinal Aerodynamics of a Vertical Takeoff and Landing Micro Air Vehicle. Ryan Randall, Christian-Alexander Hoffmann, and Sergey Shkarayev, *University of Arizona* (**48**, 1, p. 166) Article

C11-015 Flight Tests, Performances, and Flight Certification of a Twin-Engine Light Aircraft. Fabrizio Nicolosi, Agostino De Marco, and Pierluigi Della Vecchia, *University of Naples "Federico II"*, Italy (**48**, 1, p. 177) Article based on AIAA Paper 2010-7513

C11-016 Behavior of Detached-Eddy Simulations for Mild Airfoil Trailing-Edge Separation. Naveed Durrani and Ning Qin, *University of Sheffield*, Great Britain (**48**, 1, p. 193) Article

C11-017 Recovery of Energy from Leading- and Trailing-Edge Vortices in Tandem-Airfoil Configurations. D. Rival, G. Hass and C. Tropea, *Technical University of Darmstadt, Germany* (**48**, 1, p. 203) Article based on AIAA Paper 2010-8231

C11-018 Optimization of Active/Passive Flow Control Parameters on Airfoils at Transonic Speeds. Y. Volkan Pehlivanoglu, *Turkish Air Force Academy*, Turkey; and Bedri Yagiz, *Old Dominion University* (**48**, 1, p. 212) Article

C11-019 Experimental and Computational Evaluation of Small Microcoaxial Rotor in Hover. Z. Liu, *University of Toulouse*, France; R. Albertani, *University of Florida*; J. M. Moschetta, *Institut Supérieur de l'Aéronautique et de l'Espace, France*; C. Thipyopas, *Kasetsart University*, Thailand; and M. Xu, *Northwestern Polytechnic University*, China (PRC) (**48**, 1, p. 220) Article

C11-020 Evaluation of Shear-Thickening-Fluid Kevlar for Large-Fragment-Containment Applications. Robert J. Rabb and Eric P. Fahrenthold, *University of Texas at Austin* (**48**, 1, p. 230) Article based on AIAA Paper 2010-2649

C11-021 Estimating the Deployment Pressure in Pumpkin Balloons. Frank Baginski, *George Washington University*; and Kenneth Brakke, *Susquehanna University* (**48**, 1, p. 235) Article

C11-022 Usage of Numerical Optimization in Wind Turbine Airfoil Design. F. Grasso, *Energy Research Centre of the Netherlands*, The Netherlands **48**, 1, p. 248) Article based on AIAA Paper 2010-4404

C11-023 Strategic Planning of Aircraft Movements with a Three-Cost Objective. Daniel S. Zachary, Jessica Gervais, Ulrich Leopold, Georges Schutz, Viola S. Huck, and Christian Braun, *Public Research Centre Henri Tudor*, Luxembourg (**48**, 1, p. 256) Article

C11-024 Optimization via FENSAP-ICE of Aircraft Hot-Air Anti-Icing Systems. M. P. Pellissier and W. G. Habashi, *McGill University*, Canada; and A. Pueyo, *Bombardier Aerospace*, Canada (**48**, 1, p. 265) Article based on AIAA Paper 2010-1238

C11-025 Study of the Reverse Delta Wing. Afaq Altaf, Ashraf A. Omar, Waqar Asrar, and Hani Bin Ludin Jamaluddin, *International Islamic University Malaysia*, Malaysia (**48**, 1, p. 277) Article

C11-026 Robust Design Optimization of Airfoils with Respect to Ice Accretion. Tiziano Ghisu, Jerome P. Jarrett, and Geoffrey T. Parks, *University of Cambridge*, Great Britain (**48**, 1, p. 287) Article

C11-027 Optimal Unmanned Aerial Vehicle Flights for Seeability and Endurance in Winds. Wei Guo and Yiyuan J. Zhao, *University of Minnesota*; and Brian Capozzi, *Mosiac ATM, Inc.* (**48**, 1, p. 305) Article

C11-028 Investigation on the Fatigue Life of an Al 8090 Helicopter Riveted T-Joint. F. Viganò, A. Manes, and M. Giglio, *Politecnico di Milano*, Italy (**48**, 1, p. 315) Article

C11-029 Evaluation of Tactical Conflict Resolution Algorithms for En Route Airspace. Russell A. Paielli, *NASA Ames Research Center* (**48**, 1, p. 324) Article

C11-030 Design of Adjoint-Based Laws for Wing Flutter Control. Karthik Palaniappan, Pradipta Sahu, Antony Jameson, and Juan J. Alonso, *Stanford University* (**48**, 1, p. 331) Technical Note

C11-031 Optimal Movable Wing Tip Strake. Vojin R. Nikolic, *Minnesota State University* (**48**, 1, p. 335) Technical Note

C11-032 Flutter of an Aircraft Flying on Mars. Kazuki Tsuji and Shigeru Sunada, *Osaka Prefecture University*, Japan (**48**, 1, p. 341) Technical Note

C11-033 Solution of the Flutter Eigenvalue Problem with Mixed Structural/Aerodynamic Uncertainty. Dan Borglund and Ulf Ringertz, *Royal Institute of Technology*, Sweden (**48**, 1, p. 343) Technical Note

C11-034 Effect of Streamwise Attachment Gap on Aerodynamic Characteristics of Gurney Flaps. Lance W. Traub and Eric O. Freienmuth, *Embry-Riddle Aeronautical University* (**48**, 1, p. 348) Technical Note

C11-035 Robust Design Optimization of Unmanned Aerial Vehicle Coaxial Rotor Considering Operational Uncertainty. Sangook Jun, *Seoul National University*, South Korea (ROK); Kwanjung Yee and Jaewon Lee, *Pusan National University*, South Korea (ROK); and Dong-ho Lee, *Seoul National University*, South Korea (ROK) (**48**, 2, p. 353) Article

C11-036 Computational Fluid Dynamics Analysis of Nozzle Plume Effects on Sonic Boom Signature. Trong T. Bui, *NASA Dryden Flight Research Center* (**48**, 2, p. 368) Article

C11-037 Fluid-Structure Coupled Analysis of a Transport Aircraft and Flight-Test Validation. Stefan Keye, *DLR, German Aerospace Center*, Germany (**48**, 2, p. 381) Article

C11-038 Modeling of Flight Dynamics of Morphing Wing Aircraft. B. Obradovic and K. Subbarao, *University of Texas at Arlington* (**48**, 2, p. 391) Article

C11-039 Transient Poststall Aerodynamic Modeling for Extreme Maneuvers in Micro Air Vehicles. Gregory W. Reich, *U.S. Air Force Research Laboratory*; Franklin E. Eastep and Aaron Altman, *University of Dayton*; and Roberto Albertani, *University of Florida* (**48**, 2, p. 403) Article

C11-040 Assessment of Low-Noise Nozzle Designs for Fighter Aircraft Applications. K. Viswanathan, *The Boeing Company*; A. Krothapalli, *Florida State University*; J. M. Seiner, *University of Mississippi*; M. J. Czech, *The Boeing Company*; B. Greska, *Florida State University*; and B. J. Jansen, *University of Mississippi* (**48**, 2, p. 412) Article

C11-041 Modeling of Dynamic Loading of Morphing-Wing Aircraft. B. Obradovic and K. Subbarao, *University of Texas at Arlington* (**48**, 2, p. 424) Article

C11-042 Flyover Noise Measurements of a Spiraling Noise Abatement Approach Procedure. Lothar Bertsch and Gertjan Looye, *DLR, German Aerospace Center*, Germany; Eckhard Anton, *RWTH Aachen University*, Germany; and Stefan Schwanke, *DFS Deutsche Flugsicherung, GmbH*, Germany (**48**, 2, p. 436) Article

C11-043 Uncertainty Importance Measure by Fast Fourier Transform for Wing Transonic Flutter. Shufang Song, Zhenzhou Lu, Weiwei Zhang, and Lijie Cui, *Northwestern Polytechnical University*, China (PRC) (**48**, 2, p. 449) Article

C11-044 Research on Energy Transmission Capacity Improvement of the Aircraft Electric Power System. Hong Lv and Jia Zhao, *Nanjing Research Institute on Simulation Technique*, China (PRC) (**48**, 2, p. 456) Article

C11-045 Predicting Arrival Delays: An Application of Spatial Analysis. Tony Diana, *Federal Aviation Administration* (**48**, 2, p. 462) Article

C11-046 Managing Failures of Aircraft Systems by Coapplication of Parametric and Nonparametric Methods. A. Z. Al-Garni, *King Fahd University of Petroleum and Minerals*, Saudi Arabia; M. Tozan, *Ayjet FTO*, Turkey; and W. G. Abdelrahman, *King Fahd University of Petroleum and Minerals*, Saudi Arabia (**48**, 2, p. 468) Article

C11-047 Influence of Blade Aerodynamic Model on the Prediction of Helicopter High-Frequency Airloads. Mary E. Kelly, *University of Glasgow*, Great Britain; and Richard E. Brown, *University of Strathclyde*, Great Britain (**48**, 2, p. 476) Article

C11-048 Single-Stringer Compression Specimen for the Assessment of Damage Tolerance of Postbuckled Structures. Chiara Bisagni and Riccardo Vescovini, *Politecnico di Milano*, Italy; and Carlos G. Dávila, *NASA Langley Research Center* (**48**, 2, p. 495) Article

C11-049 Flight Dynamics and Stability of a Tethered Inflatable Kiteplane. E. J. Terink, J. Breukels, R. Schmehl, and W. J. Ockels, *Delft University of Technology*, The Netherlands (**48**, 2, p. 503) Article

C11-050 Ducted-Fan Force and Moment Control via Steady and Synthetic Jets. Osgar J. Ohanian, Etan D. Karni, W. K. Londenberg, and Paul A. Gelhausen, *AVID LLC*; and Daniel J. Inman, *Virginia Polytechnic Institute and State University* (**48**, 2, p. 514) Article

C11-051 Stress in Triple-Row Riveted Lap Joints Under the Influence of Specific Factors. Gang Li, Guoqin Shi, and Nicholas C. Bellinger, *National Research Council Canada*, Canada (**48**, 2, p. 527) Article

C11-052 Dynamic Response to Turbulence of Tethered Lighter-than-Air Platforms. S. Redi, G. S. Aglietti, A. R. Tatnall, and T. Markvart, *University of Southampton*, Great Britain (**48**, 2, p. 540) Article

C11-053 Optimization of Helicopter Rotor Using Polynomial and Neural Network Metamodels. K. K. Saijal and Ranjan Ganguli, *Indian Institute of Science*, India; and S. R. Viswamurthy, *National Aerospace Laboratories*, India (**48**, 2, p. 553) Article

C11-054 Uncertainty Identification of Supersonic Wind-Tunnel Testing. Shinji Nagai and Hidetoshi Iijima, *Japan Aerospace Exploration Agency*, Japan (**48**, 2, p. 567) Article

C11-055 Elastic Deformation Analysis of Adhesively Bonded Composite Butt Joints in Tension. Gang Li, Andrew Johnston, Marko Yanishevsky, and Nicholas C. Bellinger, *National Research Council Canada*, Canada (**48**, 2, p. 578) Article

C11-056 Computational Evaluation of the Performance of Lifting Surfaces with Leading-Edge Protuberances. Paul W. Weber and Laurens E. Howle, *Duke University*; Mark M. Murray and David S. Miklosovic, *U.S. Naval Academy* (**48**, 2, p. 591) Article

C11-057 Failure Analysis of Cracks in the Upper Shaft of Torque Arm. Weiguo Hou, Weifang Zhang, Qingyun Tang, Xiao Liu, Zongren Wang, and Meili Ding, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**48**, 2, p. 601) Article

C11-058 Importance Analysis of the Aircraft Flap Mechanism Movement Failure. Lijie Cui, Zhenzhou Lu, and Wenrui Hao, *Northwestern Polytechnical University*, China (PRC) (**48**, 2, p. 606) Article

C11-059 Morphing Aircraft Sizing Using Design Optimization. William A. Crossley, Michael D. Skillen, Joshua B., and Brian D. Roth, *Purdue University* (**48**, 2, p. 612) Article

C11-060 Tethered Aerostat Modeling Using an Efficient Recursive Rigid-Body Dynamics Approach. Brad Hembree and Nathan Slegers, *University of Alabama in Huntsville* (**48**, 2, p. 623) Article

C11-061 Three-Dimensional Effects on Sliding and Waving Wings. A. R. Jones, C. W. Pitt Ford and H. Babinsky, *University of Cambridge*, Great Britain (**48**, 2, p. 633) Article

C11-062 Estimation of Turbulent Vertical Velocity from Nonlinear Simulations of Aircraft Response. Donglong Sheu and Chuan-Tau Lan, *National Cheng Kung University*, Taiwan (ROC) (**48**, 2, p. 645) Article

C11-063 Can Simple Models Predict Air Combat Results? Howard J. Van Horn, *Lockheed Martin Mission Systems and Sensor* (**48**, 2, p. 652) Article

C11-064 Testing and System Identification of an Ornithopter in Longitudinal Flight. Jared Grauer, Evan Ulrich, James E. Hubbard, Darryll Pines, and J. S. Humbert, *University of Maryland* (**48**, 2, p. 660) Article

C11-065 Predicting Ejection Velocity of Ejection Seat via Back Propagation Neural Network. Xiao-Dong Mao, Gui-Ping Lin, and Jia Yu, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**48**, 2, p. 668) Article

C11-066 Optimal Scheduling and Speed Adjustment in En Route Sector for Arriving Airplanes. Ta-Chung Wang and Yen-Ju Li, *National Cheng Kung University*, Taiwan (ROC) (**48**, 2, p. 673) Article

C11-067 High-Lift Multi-Element Airfoil Shape and Setting Optimization Using Multi-Objective Evolutionary Algorithms. Ernesto Benini, Rita Ponza, and Andrea Massaro, *University of Padova*, Italy (**48**, 2, p. 683) Article

C11-068 Propulsion System of Jet-Flapped Subsonic Civil Transport Aircraft Design. Nikolaos Kehayas, *Hellenic Air Force Academy*, Greece (**48**, 2, p. 697) Design Forum

C11-069 Range and Endurance Estimates for Battery-Powered Aircraft. Lance W. Traub, *Embry-Riddle Aeronautical University* (**48**, 2, p. 703) Technical Note

C11-070 Euler Calculation of Rotor-Airframe Interaction Based on Unstructured Overset Grids. He-yong Xu and Zheng-yin Ye, *Northwestern Polytechnical University*, China (PRC) (**48**, 2, p. 707) Technical Note

C11-071 Multigrid Acceleration and Chimera Technique for Viscous Flow Past a Hovering Rotor. Aiming Yang and Xiaoquan Yang, *Fudan University*, China (PRC) (**48**, 2, p. 713) Technical Note

C11-072 Limit Cycle Oscillations of Plate-Type Fins Using Increased-Order Models. Dani Levin and Moti Karpel, *Technion–Israel Institute of Technology*, Israel (**48**, 2, p. 715) Technical Note

C11-073 Experimental Studies of Open Cavity Configurations at Transonic Speeds with Flow Control. C. Lada, *Delft University of Technology*, The Netherlands; and K. Kontis, *University of Manchester*, Great Britain (**48**, 2, p. 719) Technical Note

C11-074 Ice Shape Characterization Using Self-Organizing Maps. Stephen T. McClain, *Baylor University*; Peter Tino, *University of Birmingham*, Great Britain; and Richard E. Kreeger, *NASA John H. Glenn Research Center at Lewis Field* (**48**, 2, p. 724) Technical Note

C11-075 Aerodynamic Characteristics of High-Lift Devices with Downward Deflection of Spoiler. Xiao-liang Wang and Fu-xin Wang, *Shanghai Jiao Tong University*, China (PRC); and Ya-lin Li, *COMAC*, China (PRC) (**48**, 2, p. 730) Technical Note

C11-076 Systems Engineering Perspectives on Technology Readiness Assessments in Software-Intensive System Development. Peter Hantos, *The Aerospace Corporation* (**48**, 3, p. 738) Article

C11-077 Value-Driven Design. Paul D. Collopy, *Value-Driven Design Institute*; and Peter M. Hollingsworth, *University of Manchester*, Great Britain (**48**, 3, p. 749) Article

C11-078 Taxonomy to Guide Systems-of-Systems Decision-Making in Air Transportation Problems. Daniel A. DeLaurentis, William A. Crossley, and Muharrem Mane, *Purdue University* (**48**, 3, p. 760) Article

C11-079 What the United States Air Force Is Doing Right About Systems Engineering. Paul C. Lambertson, John H. Pletcher, and Gary E. Yale, *U.S. Air Force Academy* (**48**, 3, p. 771) Article

C11-080 System-Level Airworthiness Tool. David A. Burke and Charles E. Hall, *North Carolina State University*; and Stephen P. Cook, *Naval Air Systems Command* (**48**, 3, p. 777) Article based on AIAA Paper 2010-970

C11-081 Full-Scale Flight Tests of Active Flow Control to Reduce Tiltrotor Aircraft Download. Michael A. McVeigh, *The Boeing Company*; Hassan Nagib, *Illinois Institute of Technology*; Tom Wood, *Bell Helicopter Textron, Inc.*; and Israel Wygnanski, *University of Arizona* (**48**, 3, p. 786) Article

C11-082 Material Selection for a Curved C-Spar Based on Cost Optimization. Markus Kaufmann, Dan Zenkert and Malin Åkermo, *Royal Institute of Technology, Sweden* (**48**, 3, p. 797) Article

C11-083 Modeling of Wing Rock Based on Frequency Spectrum Analysis to Free-to-Roll Time History. Bing Wang, Xue-Ying Deng, Bao-Feng Ma, Zhen Rong, and Bo-Chao Cao, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**48**, 3, p. 805) Article

C11-084 Assessment of Wake-Vortex Encounter Probabilities for Crosswind Departure Scenarios. Frank Holzäpfel and Jan Kladetzke, *DLR, German Aerospace Center*, Germany (**48**, 3, p. 812) Article

C11-085 Aeroelastic Analysis of T-Tails Using an Enhanced Doublet Lattice Method. Louw H. van Zyl and Edward H. Mathews, *North-West University*, South Africa (**48**, 3, p. 823) Article

C11-086 Benefits of Incorporating Designer Preferences Within a Multi-Objective Airfoil Design Framework. Robert Carrese, Hadi Winarto, Jon Watmuff, and Upali J. Wickramasinghe, *Royal Melbourne Institute of Technology*, Australia (**48**, 3, p. 832) Article

C11-087 Numerical Optimization and Experimental Investigations on the Principle of the Vortex Diffuser. Stefan Puttinger, Andreas Mehrle, and Philipp Gittler, *Johannes Kepler University of Linz*, Austria; and Walter Meile, *Graz University of Technology*, Austria (**48**, 3, p. 845) Article

C11-088 Aerodynamic Performance of Extended Formation Flight. S. A. Ning, Tristan C. Flanzer, and Ilan M. Kroo, *Stanford University* (**48**, 3, p. 855) Article

C11-089 Quantification of Modeling Uncertainty in Aeroelastic Analyses. Matthew E. Riley and Ramana V. Grandhi, *Wright State University*; and Raymond Kolonay, *U.S. Air Force Research Laboratory* (**48**, 3, p. 866) Article

C11-090 Flutter of Aircraft Wings Carrying a Powered Engine Under Roll Maneuver. A. Mazidi and S. A. Fazelzadeh, *Shiraz University*, Iran; and P. Marzocca, *Clarkson University* (**48**, 3, p. 874) Article

C11-091 Improvement to Patched Grid Technique with High-Order Conservative Remapping Method. Yufei Zhang, Haixin Chen, and Song Fu, *Tsinghua University*, China (PRC) (**48**, 3, p. 884) Article

C11-092 Aerodynamic Effects of Structural Flexibility in Two-Dimensional Insect Flapping Flight. Kuen-Bae Lee, Jin-Ho Kim, and Chongam Kim, *Seoul National University*, South Korea (ROK) (**48**, 3, p. 894) Article

C11-093 Stress Intensity Factor Solution for Cracks at an Offset Loaded Fastener Hole. Yan Bombardier and Min Liao, *National Research Council Canada*, Canada (**48**, 3, p. 910) Article

C11-094 Aerodynamic Considerations in the Design of Truss-Braced-Wing Aircraft. Ohad Gur, Joseph A. Schetz, and William H. Mason, *Virginia Polytechnic Institute and State University* (**48**, 3, p. 919) Article

C11-095 Feedback-Controlled Forcefully Attached Flow on a Stalled Airfoil. Philipp Tewes and Israel Wygnanski, *University of Arizona*; and Anthony E. Washburn, *NASA Langley Research Center* (**48**, 3, p. 940) Article

C11-096 Safety Considerations for Helicopter Roll on Takeoffs. K. Enciu and A. Rosen, *Technion–Israel Institute of Technology*, Israel (**48**, 3, p. 952) Article

C11-097 Flight Mechanical Evaluation of Approaches. Monique Heiligers, Theo van Holten, and Max Mulder, *Delft University of Technology*, The Netherlands (**48**, 3, p. 963) Article

C11-098 Factors that Influence Pilot Task Demand Load During Area Navigation Approaches. Monique Heiligers, Theo van Holten, and Max Mulder, *Delft University of Technology*, The Netherlands (**48**, 3, p. 975) Article

C11-099 Aerodynamic Evaluation of Miniature Trailing-Edge Effectors for Active Rotor Control. Claude G. Matalanis, Brian E. Wake, and Daniel Opoku, *United Technologies Research Center*; Byung-Young Min, Nandita Yeshala, and Lakshmi Sankar, *Georgia Institute of Technology* (**48**, 3, p. 995) Article

C11-100 1303 Unmanned Combat Air Vehicle Flowfield Simulations and Comparison with Experimental Data. Scott E. Sherer, Miguel R. Visbal, and Raymond E. Gordnier, *U.S. Air Force Research Laboratory*; Turgut O. Yilmaz and Donald O. Rockwell, *Lehigh University* (**48**, 3, p. 1005) Article

C11-101 Ultrasonic De-Icing of Wind-Tunnel Impact Icing. Jose Palacios, Edward Smith, and Joseph Rose, *Pennsylvania State University*; and Roger Royer, *FBS Worldwide, Inc.* (**48**, 3, p. 1020) Article

C11-102 Uncertainty Analysis of a Dynamic Model of a Novel Remotely Piloted Airship. Keith Worden, *University of Sheffield, Great Britain*; William Becker, Manuela Battipede and Cecilia Surace, *Politecnico di Torino*, Italy (**48**, 3, p. 1028) Article

C11-103 Improvement of Unstructured Computational Fluid Dynamics Simulations Through Novel Mesh Generation Methodologies. Simone Crippa, *DLR, German Aerospace Center*, Germany (**48**, 3, p. 1036) Article

C11-104 Flow Control of Tiltrotor Unmanned-Aerial-Vehicle Airfoils Using Synthetic Jets. Minhee Kim, Sanghoon Kim, Woore Kim, and Chongam Kim, *Seoul National University*, South Korea (ROK); and Yushin Kim, *Korea Aerospace Research Institute*, South Korea (ROK) (**48**, 3, p. 1045) Article

C11-105 Influence of Blade Aerodynamic Model on Prediction of Helicopter Rotor Aeroacoustic Signatures. Mary E. Kelly, *University of Glasgow*, Great Britain; and Richard E. Brown, *University of Strathclyde*, Great Britain (**48**, 3, p. 1058) Article

C11-106 Active Transonic Aerofoil Design Optimization Using Robust Multiobjective Evolutionary Algorithms. D. S. Lee, J. Periaux, and E. Onate, *International Center for Numerical Methods in Engineering*, Spain; L. F. Gonzalez, *Australian Research Centre Aerospace Automation, Queensland University of Technology*, Australia; and N. Qin, *University of Sheffield*, Great Britain (**48**, 3, p. 1084) Article

C11-107 Approach to Assess Bird Strike Resistance for a Wing Slat Structure. P. Xue, N. Zhao, J. Liu, and Y. L. Li, *Northwestern Polytechnical University*, China (PRC) (**48**, 3, p. 1095) Article

C11-108 Estimating Aircraft Fuel Flow for a Three-Degree Flight-Path-Angle Descent. Enis T. Turgut, *Anadolu University*, Turkey (**48**, 3, p. 1099) Article

C11-109 Performance of Coflow Jet Airfoils with Conformal Slot Geometries. Jun-Mei Zhang, Tat L. Chng, and Her M. Tsai, *National University of Singapore*, Singapore (ROS) (**48**, 3, p. 1107) Technical Note

C11-110 Effect of Slenderness Ratio on Free-to-Roll Wing Aerodynamics. N. T. Gresham, Z. Wang, and I. Gursul, *University of Bath*, Great Britain (**48**, 3, p. 1112) Technical Note

C11-111 Frequency Dependence of ZONA6. William P. Rodden, (**48**, 3, p. 1116) Technical Note

C11-112 Research on a New Aircraft Point-Mass Model. Fumiaki Imado, *Shinshu University*, Japan; Yuki Heike, *All Nippon Airways Company, Ltd.*, Japan; and Takuya Kinoshita, *Ministry of Defense*, Japan (**48**, 4, p. 1121) Article

C11-113 Mixed-Fidelity Approach for Design of Low-Boom Supersonic Aircraft. Wu Li, *NASA Langley Research Center*; Elwood Shields, *Alliant Techsystems, Inc.*; and Karl Geiselhart, *NASA Langley Research Center* (**48**, 4, p. 1131) Article

C11-114 Experiments with Geometric Nonlinear Coupling for Analytical Validation. Jonathan Boston, Eric Swenson, and Donald Kunz, *Air Force Institute of Technology*; Wenbin Yu, *Utah State University*; and Maxwell Blair, *U.S. Air Force Research Laboratory* (**48**, 4, p. 1136) Article

C11-115 Design of a Supersonic Natural Laminar Flow Wing–Body. E. Iuliano, D. Quagliarella, and R. S. Donelli, *Italian Aerospace Research Center*, Italy; I. Salah El Din and D. Arnal, *ONERA*, France (**48**, 4, p. 1147) Article

C11-116 Design, Optimization, and Evaluation of Integrally Stiffened Al-7050 Panel with Curved Stiffeners. Wesley C. Slemp, *Virginia Polytechnic Institute and State University*; R. K. Bird, *NASA Langley Research Center*; Rakesh K. Kapania, *Virginia Polytechnic Institute and State University*; David Havens, Ashley Norris, and Robert Olliffe, *Lockheed Martin Aeronautics Company* (**48**, 4, p. 1163) Article

C11-117 Industrial Application of Robust Aeroelastic Analysis. Martin C. Leijonhufvud, *Saab AB, Brazil*; and Anders Karlsson, *Saab AB*, Sweden (**48**, 4, p. 1176) Article

C11-118 Wake Effects of Free-Wake Model on Aeroelastic Behavior of Hovering Rotors. Seung-Jae Yoo, Min-Soo Jeong, and In Lee, *Korea Advanced Institute of Science and Technology*, South Korea (ROK) (**48**, 4, p. 1184) Article

C11-119 Optimal Structural Topology of a Platelike Wing for Subsonic Aeroelastic Stability. Bret Stanford and Philip Beran, *U.S. Air Force Research Laboratory* (**48**, 4, p. 1193) Article

C11-120 Gust-Response Analysis of Free Elastic Aircraft in the Transonic Flight Regime. Daniella E. Raveh, *Technion–Israel Institute of Technology*, Israel (**48**, 4, p. 1204) Article

C11-121 Low-Reynolds-Number Effect on Aerodynamic Characteristics of a NACA 0012 Airfoil. Dong-Ha Kim, *Korea Aerospace Research Institute*, South Korea (ROK); Jo-Won Chang, *Korea Aerospace University*, South Korea (ROK); and Joon Chung, *Ryerson University*, Canada (**48**, 4, p. 1212) Article

C11-122 Hybrid Solid Oxide Fuel Cell and Micro Gas Turbine for Regional Jets. M. Santarelli, *Politecnico di Torino*, Italy; and M. Cabrera, *HySyTech, SRL*, Italy (**48**, 4, p. 1216) Article

C11-123 Multi-Aircraft Dynamic Continuous Descent Approach Methodology for Low-Noise and Emission Guidance. S. Alam, M. H. Nguyen, H. A. Abbass, and Chris Lokan, *University of New South Wales, Australian Defence Force Academy*, Australia; M Ellejmi and S. Kirby, *EUROCONTROL Cooperative Network Design*, France (**48**, 4, p. 1225) Article

C11-124 Residual Stress Effects and Fatigue Behavior of Friction-Stir-Welded 2198-T8 Al-Li Alloy Joints. Yu E. Ma, *Northwestern Polytechnical University*, China (PRC); and Phil Irving, *Cranfield University*, Great Britain (**48**, 4, p. 1238) Article

C11-125 Advanced Sonic Boom Prediction Using the Augmented Burgers Equation. Sriram K. Rallabhandi, *National Institute of Aerospace* (**48**, 4, p. 1245) Article

C11-126 Numerical Continuation Applied to Landing Gear Mechanism Analysis. J. A. Knowles, B. Krauskopf, and M. H. Lowenberg, *University of Bristol*, Great Britain (**48**, 4, p. 1254) Article

C11-127 Flutter Analysis of Aerostructures Test Wing with Test Validated Structural Dynamic Model. Chan-gi Pak and Shun-fat Lung, *NASA Dryden Flight Research Center* (**48**, 4, p. 1263) Article

C11-128 Estimation of Captive Flight Loads Using Grid-Free Euler Solver. Vaibhav Shah, Rohit R. More, S. Srinivasa Raju, K. Anandhanayaranan, R. Krishnamurthy, and Debasis Chakraborty, *Defence Research and Development Laboratory*, India (**48**, 4, p. 1273) Article

C11-129 Departure and Approach Procedures for Unmanned Aircraft Systems in a Visual-Flight-Rule Environment. Xavier Prats, Luis Delgado, Pablo Royo, Marc Pérez-Batlle, and Enric Pastor, *Technical University of Catalonia*, Spain (**48**, 4, p. 1280) Article

C11-130 Improved Range Equation Based on Aircraft Flight Data. William E. Randle, Cesare A. Hall, and Maria Vera-Morales, *University of Cambridge*, Great Britain (**48**, 4, p. 1291) Article

C11-131 Steel Structure Impacting onto Water: Coupled Finite Element–Smoothed-Particle-Hydrodynamics Numerical Modeling. A. Grimaldi, *University of Naples "Federico II", Italy*; D. J. Benson, *University of California, San Diego*; F. Marulo and M. Guida, *University of Naples "Federico II"*, Italy (**48**, 4, p. 1299) Article

C11-132 Two Men in a Cockpit: Casualty Likelihood if One Pilot Becomes Incapacitated. Ephraim Suhir, *University of California, Santa Cruz*; and Richard H. Mogford, *NASA Ames Research Center* (**48**, 4, p. 1309) Article

C11-133 Impact of Mechanical Strain Environment on Aircraft Protective Coatings and Corrosion Protection. Ung H. Tiong and Graham Clark, *RMIT University*, Australia (**48**, 4, p. 1315) Article

C11-134 Setup and Test Flights of All-Electric Two-Seater Aeroplane Powered by Fuel Cells. Giulio Romeo, Fabio Borello, and Gabriel Correa, *Politecnico di Torino*, Italy (**48**, 4, p. 1331) Article

C11-135 Reliable and Cost-Effective Flight Testing of Ultralight Aircraft. Lorenzo Trainelli and Alberto Rolando, *Politecnico di Milano*, Italy (**48**, 4, p. 1342) Article

C11-136 Unmanned Aircraft Systems in the Civil Airworthiness Regulatory System: A Case Study. C. Cuerno-Rejado and R. Martínez-Val, *Universidad Politécnica de Madrid*, Spain (**48**, 4, p. 1351) Article

C11-137 Buckling Behavior of an Orthotropic Plate Strip Under Combined Compression and Shear. M. Beerhorst and M. Seibel, *HAW Hamburg*, Germany; and C. Mittelstedt, *ELAN, GmbH*, Germany (**48**, 4, p. 1360) Article

C11-138 Boundary-Layer Suction System Design for Laminar-Flying-Wing Aircraft. T. I. Saeed, W. R. Graham, and C. A. Hall, *University of Cambridge*, Great Britain (**48**, 4, p. 1368) Article

C11-139 Research on Thermal Characteristics of Photovoltaic Array of Stratospheric Airship. Xiaojian Li, Xiande Fang, and Qiuming Dai, *Nanjing University of Aeronautics and Astronautics*, China (PRC) (**48**, 4, p. 1380) Article

C11-140 Fatigue Crack Initiation and Propagation in Aileron Lever Using Successive-Initiation Modeling Approach. James Gyllenskog, *U.S. Air Force*; and Leila J. Ladani, *University of Alabama* (**48**, 4, p. 1387) Article

C11-141 New European Union Approach to Civil Aviation Accident Investigation and Prevention. R. M. Arnaldo Valdés, *Polytechnic University of Madrid*, Spain; and Fernando Gómez Comendador, *INECO*, Spain (**48**, 4, p. 1396) Article

C11-142 Simulating the Flows About Cargo Containers Used During Parachute Airdrop Operations. Mark McQulling and Jean Potvin, *Saint Louis University*; and Justin Riley, *Natick Soldier Research, Development, and Engineering Center* (**48**, 4, p. 1405) Article

C11-143 Analytical Modeling of Runway Stone Lofting. Sang N. Nguyen and Emile S. Greenhalgh, *Imperial College London*, Great Britain; and Robin Olsson, *Swerea SICOMP AB*, Sweden (**48**, 4, p. 1412) Article

C11-144 Ionospheric Threat Mitigation by Geometry Screening in Ground-Based Augmentation Systems. Jiyun Lee, *Korea Advanced Institute of Science and Technology*, South Korea (ROK); Jiwon Seo, Young S. Park, Sam Pullen, and Per Enge, *Stanford University* (**48**, 4, p. 1422) Article

C11-145 Refined Numerical Simulation of Three-Dimensional Riveting in Laminated Composites. Tae Ho Yoon and Seung Jo Kim, *Seoul National University*, South Korea (ROK) (**48**, 4, p. 1434) Article

C11-146 Spurious Far-Field-Boundary Induced Drag in Two-Dimensional Flow Simulations. Daniel Destarac, *ONERA*, France (**48**, 4, p. 1444) Article

C11-147 New Air Traffic Control Markets Promoted by Single Sky Regulation in Spain. F. Gómez Comendador, *INECO*, Spain; R. Arnaldo and L. Pérez, *Polytechnic University of Madrid*, Spain (**48**, 4, p. 1456) Article

C11-148 Aircraft Control System Validation via Hardware-in-the-Loop Simulation. Libor Waszniowski and Zdeněk Hanzálek, *Czech Technical University in Prague*, Czech Republic; and Jirí Doubrava, *AERO Vodochody a.s.*, Czech Republic (**48**, 4, p. 1466) Technical Note

C11-149 Investigating Negative Drag in Grid Convergence for Two-Dimensional Euler Solutions. Daniel Destarac, *ONERA*, France (**48**, 4, p. 1468) Technical Note

C11-150 Efficient Aerodynamic Design of Complex Configurations by Patch-Surface Approach. Keizo Takanaka and Keita Hatanaka, *Mitsubishi Aircraft Corporation*, Japan; and Kazuhiro Nakahashi, *Tohoku University*, Japan (**48**, 5, p. 1473) Article

C11-151 Harmonizing European and American Aviation Modernization Efforts Through Visual Analytics. Olivia J. Pinon, Dimitri N. Mavris, and Elena Garcia, *Georgia Institute of Technology* (**48**, 5, p. 1482) Article

C11-152 Detached-Eddy Simulation of a Coflow Jet Airfoil at High Angle of Attack. Baoyuan Wang and Ge-Cheng Zha, *University of Miami* (**48**, 5, p. 1495) Article

C11-153 Uncertainty Quantification in Helicopter Performance Using Monte Carlo Simulations. C. Siva, *Indian Institute of Science, Bangalore*, India; M. S. Murugan, *Swansea University*, Great Britain; and Ranjan Ganguli, *Indian Institute of Science, Bangalore*, India (**48**, 5, p. 1503) Article

C11-154 Aeroelastic Analysis and Experiment for Wing/Store Model with Stiction Nonlinearity. Deman Tang and Earl H. Dowell, *Duke University* (**48**, 5, p. 1512) Article

C11-155 Seven Guidelines for Limiting Pilot Task Demand Load During Area Navigation Approaches. Monique Heiligers, Theo van Holten, and Max Mulder, *Delft University of Technology, The Netherlands* (**48**, 5, p. 1531) Article

C11-156 Analysis of Medium-Speed Runway Exit Maneuvers. Etienne Coetzee, *Airbus SAS*, Great Britain; Bernd Krauskopf and Mark Lowenberg, *University of Bristol*, Great Britain (**48**, 5, p. 1553) Article

C11-157 Numerical Simulation of Gurney Flap on RAE-2822 Supercritical Airfoil. T. Yu, J. J. Wang, and P. F. Zhang, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**48**, 5, p. 1565) Article

C11-158 Mission Performance Considered as Point Performance in Aircraft Design. Robert A. McDonald, *California Polytechnic State University* (**48**, 5, p. 1576) Article

C11-159 Incremental Method for Structural Analysis of Joined-Wing Aircraft. Zahra Sotoudeh and Dewey H. Hodges, *Georgia Institute of Technology* (**48**, 5, p. 1588) Article

C11-160 Aircraft Conceptual Design Optimization Considering Fidelity Uncertainties. Daniel Neufeld, *Konkuk University*, South Korea (ROK); Joon Chung and Kamran Behdinian, *Ryerson University*, Canada (**48**, 5, p. 1602) Article

C11-161 Modeling of Urban Wind Field Effects on Unmanned Rotorcraft Flight. David Galway and J. Etele, *Carleton University*, Canada; and Giovanni Fusina, *Defence Research and Development Canada*, Canada (**48**, 5, p. 1613) Article

C11-162 Eulerian Modeling of Large Droplet Physics Toward Realistic Aircraft Icing Simulation. E. Iuliano, G. Mingione, and F. Petrosino, *Italian Aerospace Research Center*, Italy; and F. Hervy, *Direction Générale de l'Armement*, France (**48**, 5, p. 1621) Article

C11-163 Optimization of Three-Dimensional Wings in Ground Effect Using Multiobjective Genetic Algorithm. Sang-Hwan Lee, *Hanyang University*, South Korea (ROK); and Juhee Lee, *Hoseo University*, South Korea (ROK) (**48**, 5, p. 1633) Article

C11-164 Multiple-Point Integrated Scheduling of Terminal Area Traffic. Heming Chen and Yiyuan J. Zhao, *University of Minnesota*; and Chris Provan, *Mosaic ATM* (**48**, 5, p. 1646) Article

C11-165 Computational Drag Prediction of the DPW4 Configuration Using the Far-Field Approach. David Hue and Sébastien Esquieu, *ONERA*, France (**48**, 5, p. 1658) Article

C11-166 Wing-Box Weight Optimization Using Curvilinear Spars and Ribs (SpaRibs). Davide Locatelli, Sameer B. Mulani, and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**48**, 5, p. 1671) Article

C11-167 Efficient Multipoint Aerodynamic Design Optimization Via Cokriging. David J. Toal and Andy J. Keane, *University of Southampton*, Great Britain (**48**, 5, p. 1685) Article

C11-168 Crack Analysis of the Fourth-Stage Compressor Blades. Weiguo Hou, Weifang Zhang, Xiao Liu, Zongren Wang, and Qingyun Tang, *Beihang University*, China (PRC) (**48**, 5, p. 1696) Article

C11-169 Climb Performance of a Piston-Propeller Airplane with Cambered Wing and Variable Propeller Efficiency. Aydan Cavcar, *Anadolu University*, Turkey (**48**, 5, p. 1701) Article

C11-170 Influence of Using Various Unsteady Aerodynamic Models on Propeller Flutter Prediction. V. Ognev and Aviv Rosen, *Technion–Israel Institute of Technology*, Israel (**48**, 5, p. 1708) Article

C11-171 Example of the Integration of Atmospheric Flight Equations. Dilmurat M. Azimov, *University of Texas at Austin* (**48**, 5, p. 1722) Article

C11-172 Importance Measure Analysis in the Presence of Epistemic and Aleatory Uncertainties. Pengfei Wei, Zhenzhou Liu, and Wenrui Hao, *Northwestern Polytechnical University*, China (PRC) (**48**, 5, p. 1733) Article

C11-173 New Topology Optimization Method for Wing Leading-Edge Ribs. Wang Qi, Zhenzhou Lu, and Changcong Zhou, *Northwestern Polytechnical University*, China (PRC) (**48**, 5, p. 1741) Article

C11-174 Deformation and Breakup of Water Droplets near an Airfoil Leading Edge. Mario Vargas, *NASA John H. Glenn Research Center at Lewis Field*; and Alex Feo, *National Institute of Aerospace Technology (INTA)*, Spain (**48**, 5, p. 1749) Article

C11-175 Numerical Simulation of Free-Flight Rockets Air-Launched From a Helicopter. Bum S. Lee, Jae H. Choi, and Oh Joon Kwon, *Korea Advanced Institute of Science and Technology*, South Korea (ROK) (**48**, 5, p. 1766) Article

C11-176 Experimental Investigation of the Effect of Trip Strips at Low Reynolds Number. Lance W. Traub, *Embry-Riddle Aeronautical University* (**48**, 5, p. 1776) Article

C11-177 Assessment of Narrow-Body Transport Airplane Evacuation by Numerical Simulation. Jose M. Hedo and Rodrigo Martinez-Val, *Universidad Politécnica de Madrid*, Spain (**48**, 5, p. 1785) Article

C11-178 Multi-Objective Optimization of a Turbofan for an Advanced, Single-Aisle Transport. Jeffrey J. Berton, *NASA John H. Glenn Research Center at Lewis Field*; and Mark D. Guynn, *NASA Langley Research Center* (**48**, 5, p. 1795) Design Forum

C11-179 Robust Design Optimization of Flexible Backswept Wings with Structural Uncertainties. Zhiqiang Wan, Zhipeng Xiao, and Chao Yang, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**48**, 5, p. 1806) Technical Note

C11-180 Nonlinear Longitudinal Aerodynamic Modeling Using Neural Gauss–Newton Method. Rakesh Kumar and A. K. Ghosh, *Indian Institute of Technology*, India (**48**, 5, p. 1809) Technical Note

C11-181 Extended Nonlinear Lifting-Line Method for Aerodynamic Modeling of Reconfigurable Aircraft. Adam M. Wickenheiser, *George Washington University*; and Ephrahim Garcia, *Cornell University* (**48**, 5, p. 1812) Technical Note

C11-182 Aeroelastic Analysis of a Hingeless Rotor Using a Dynamic Wake Model. Joonbae Lee and Kwanjung Yee, *Pusan National University*, South Korea (ROK); Seung-Jae Yoo and In Lee, *Korea Advanced Institute of Science and Technology*, South Korea (ROK); SangJoon Shin, *Seoul National University*, South Korea (ROK); and Deog-Kwan Kim, *Korea Aerospace Research Institute*, South Korea (ROK) (**48**, 5, p. 1817) Technical Note

C11-183 Stall Warning Using Flap Hinge Moment Measurements. Philip J. Ansell and Michael B. Bragg, *University of Illinois at Urbana–Champaign*; and Michael F. Kerho, *Rolling Hills Research Corporation* (**48**, 5, p. 1822) Technical Note

C11-184 Undercarriage Lateral Tip-Over Criteria: A Parametric Study. Rikard B. Heslehurst, *University of University of New South Wales*, Australia (**48**, 6, p. 1825) Article

C11-185 Effects of Sloshing on Flutter Prediction of Liquid-Filled Circular Cylindrical Shell. Farhad Sabri and Aouni A. Lakis, *École Polytechnique de Montréal*, Canada (**48**, 6, p. 1829) Article

C11-186 Structural Sizing, Aeroelastic Analysis, and Optimization in Aircraft Conceptual Design. L. Cavagna, *FOI, Swedish Defence Research Agency*, Sweden; S. Ricci and L. Riccobene, *Politecnico di Milano*, Italy (**48**, 6, p. 1840) Article

C11-187 Random Response Analysis of Curvilinearly Stiffened Plates Using Element-Free Galerkin Method. Ali Yeilaghi Tamijani and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**48**, 6, p. 1856) Article

C11-188 Shooting-Based Complete Bifurcation Prediction for Aeroelastic Systems with Freeplay. Grigorios Dimitriadis, *University of Liège*, Belgium (**48**, 6, p. 1864) Article

C11-189 Automatic Transition Prediction for Three-Dimensional Configurations with Focus on Industrial Application. Normann Krimmelbein and Andreas Krumbein, *DLR, German Aerospace Center*, Germany (**48**, 6, p. 1878) Article

C11-190 Novel Approach to Risk Assessment of Aircraft Electrical Wiring Interconnect System. Qiang Guo, *Commercial Aircraft Corporation of China, Ltd.*, China (PRC) (**48**, 6, p. 1888) Article

C11-191 Investigating the Potential of Using Quota Count as a Design Metric. Peter Hollingsworth and David Sulitzer, *University of Manchester*, Great Britain (**48**, 6, p. 1894) Article

C11-192 Performance Prediction of Inlet Barrier Filters for Rotorcraft Engines. Nicholas Bojdo and Antonio Filippone, *University of Manchester*, Great Britain (**48**, 6, p. 1903) Article

C11-193 Ice Accretion Model on Multi-Element Airfoil. F. Petrosino, G. Mingione, and A. Carozza, *CIRA, Italian Aerospace Research Center*, Italy; T. Gilardoni and G. D'Agostini, *Piaggio Aero Industries S.p.A.*, Italy (**48**, 6, p. 1913) Article

C11-194 Effects of the Mismatch Between Design Capabilities and Actual Aircraft Utilization. Rodrido Martinez-Val, Javier Roa, Emilio Perez, and Cristina Cuerno, *Universidad Politecnica de Madrid*, Spain (**48**, 6, p. 1921) Article

C11-195 Shotline Method for Estimating the Aircraft Infrared Radiant Intensity. Yang Pei, Hao Meng, and Bifeng Song *Northwestern Polytechnical University*, China (PRC) (**48**, 6, p. 1928) Article

C11-196 Theoretical and Experimental Analysis of Hysteresis in Piezocomposite Airfoils Using Preisach Model. Onur Bilgen and Michael I. Friswell, *Swansea University*, Great Britain; and Daniel J. Inman, *Virginia Polytechnic Institute and State University* (**48**, 6, p. 1935) Article

C11-197 Vortical Flow Prediction Validation for an Unmanned Combat Air Vehicle Model. D. Vallespin, A. Da Ronch, and K. J. Badcock, *University of Liverpool*, Great Britain; and O. Boelens, *National Aerospace Laboratory/NLR*, The Netherlands (**48**, 6, p. 1948) Article

C11-198 Modal Analysis of a Flexible Membrane Wing of Micro Air Vehicles. Uttam K. Chakravarty, *U.S. Air Force Research Laboratory*; and Roberto Albertani, *Oregon State University* (**48**, 6, p. 1960) Article

C11-199 Smart Aerodynamic Surface for a Typical Military Aircraft Using Shape Memory Elements. S. Jayasankar, P. Senthil Kumar, B. Varughese, B. Ramanaiah, S. Vishwanath, H. V. Ramachandra, and G. N. Dayananda, *National Aerospace Laboratories*, India (**48**, 6, p. 1968) Article

C11-200 Experimental Setup for the Study of Runback Ice at Full Scale. N. AlŁgre and D. Hammond, *Cranfield University*, Great Britain (**48**, 6, p. 1978) Article

C11-201 Optimum Aspect Ratio for Subsonic Air Vehicles. Timothy T. Takahashi, *Santa Clara University* (**48**, 6, p. 1984) Article

C11-202 Numerical Study of Transient Aircraft Cabin Flowfield with Unsteady Air Supply. Chaofan Wu and Noor A. Ahmed, *University of New South Wales*, Australia (**48**, 6, p. 1994) Article

C11-203 Random Propagation of a Crack in a Thin-Walled Beam. Chalitphan Kunaporn, Mahendra P. Singh, Mayuresh J. Patil, and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**48**, 6, p. 2002) Article

C11-204 Aerodynamics of Airfoils at High and Reverse Angles of Attack. Marilyn J. Smith, Nicholas D. Liggett, and Benjamin C. Koukol, *Georgia Institute of Technology* (**48**, 6, p. 2012) Article

C11-205 Air Traffic Control Service Quality Perceptions of Domestic Airline Pilots in Turkey. Aydan Cavcar and Ertan Cinar, *Anadolu University*, Turkey (**48**, 6, p. 2024) Article

C11-206 Dynamic Simulation of Aircraft Environmental Control System Based on Flowmaster. Y. Tu and G. P. Lin, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**48**, 6, p. 2031) Article

C11-207 Stability of Lobed Superpressure Balloons During Ascent. Markus Pagitz, *Delft University of Technology*, The Netherlands (**48**, 6, p. 2042) Article

C11-208 Integrated Experimental-Numerical Analysis of High-Agility Aircraft Wake Vortex Evolution. Jan-Ulrich Klar, Christian Breitsamter, Stefan Hickel, and Nikolaus Adams, *Technical University of Munich*, Germany (**48**, 6, p. 2050) Article

C11-209 Simulation of Large Fragment Impacts on Shear-Thickening Fluid Kevlar Fabric Barriers. Robert J. Rabb and Eric P. Fahrenthold, *University of Texas at Austin* (**48**, 6, p. 2059) Article

C11-210 Summary of the First AIAA CFD High-Lift Prediction Workshop. C. L. Rumsey, *NASA Langley Research Center*; J. P. Slotnick, *The Boeing Company*; M. Long, *University of Wyoming*; R. A. Stuever, *Hawker Beechcraft Corporation*; and T. R. Wayman, *Gulfstream Aerospace Corporation* (**48**, 6, p. 2068) Article

C11-211 Foam-Core Effect on the Integrity of Tailplane Leading Edge During Bird-Strike Event. Reza Hedayati and Saeed Ziaei-Rad, *Isfahan University of Technology*, Iran (**48**, 6, p. 2080) Article

C11-212 Development of a Probabilistic Linear Damage Methodology for Small Aircraft. J. Ocampo, H. Millwater, and G. Singh, *University of Texas at San Antonio*; H. Smith, *The Boeing Company*; F. Abali, M. Nuss, and M. Reyer, *Federal Aviation Administration*; and M. Shiao, *U.S. Army Research Laboratory* (**48**, 6, p. 2090) Article

C11-213 Global Sensitivity Analysis Using Moving Least Squares for Models with Correlated Parameters. Longfei Tian, Zhenzhou Lu, and Pengfei Wei, *Northwestern Polytechnical University*, China (PRC) (**48**, 6, p. 2107) Article

C11-214 Two-Level Wing–Body-Fairing Optimization of a Civil Transport Aircraft. Wenbin Song and Peipei Lv, *Shanghai Jiao Tong University*, China (PRC) (**48**, 6, p. 2114) Article

C11-215 Fatigue Behavior of Fiber/Metal Laminate Panels Containing Internal Carbon Tear Straps. Calvin Rans, Freddy MoriniŁre, Riccardo Rodi, René Alderliesten, and Rinze Benedictus, *Delft University of Technology*, The Netherlands (**48**, 6, p. 2122) Article

C11-216 Reliability-Based Design of Representative Wing and Tail System Together with Structural Tests. Erdem Acar, *TOBB University of Economics and Technology*, Turkey (**48**, 6, p. 2130) Article

C11-217 Structure Optimization of Large Composite Wing Box with Parallel Genetic Algorithm. Peng Jin, Bifeng Song, and Xiaoping Zhong, *Northwestern Polytechnical University*, China (PRC) (**48**, 6, p. 2145) Article

C11-218 Structural Dynamics Model of Multi-Segmented Folding Wings: Theory and Experiment. Ivan Wang and Earl H. Dowell, *Duke University* (**48**, 6, p. 2149) Article

C11-219 Sizing of a Fully Integrated Hypersonic Commercial Airliner. A. Ingenito, Stefano Gulli, and C. Bruno, *University of Rome "La Sapienza"*, Italy; G. Colemann and B. Chudoba, *University of Texas*; and P. A. Czysz, *HyperTech Concepts, LLC* (**48**, 6, p. 2161) Technical Note

C11-220 Airfoil Separation Control Using Multiple-Orifice Air-Jet Vortex Generators. S. Shun and N. A. Ahmed, *University of New South Wales*, Australia (**48**, 6, p. 2164) Technical Note

C11-221 Uncertainty Tolerance of Multiobjective Environmentally Friendly Departure Procedures for Civil Aircraft. R. Torres and C. Bes, *Université de Toulouse*, France (**48**, 6, p. 2169) Technical Note

C11-222 Estimating Propeller Slipstream Drag on Airplane Performance. Kasim Biber, *Bartin University*, Turkey (**48**, 6, p. 2172) Technical Note

C11-223 Modal Analysis of a Composite Wing of Micro Air Vehicle. Uttam K. Chakravarty, *U.S. Air Force Research Laboratory* (**48**, 6, p. 2175) Technical Note

C11-224 Unsteady Aerodynamic Model Tuning for Precise Flutter Prediction. Chan-gi Park, *NASA Dryden Flight Research Center* (**48**, 6, p. 2178) Technical Note
